

LexisNexisRisk.com Transition

Frequently Asked Questions

Background

LexisNexis® Risk Solutions is updating infrastructure by portals and API endpoints from **lexisnexis.com** to the **lexisnexisrisk.com** domain. This document provides detailed and actionable steps to help your organization prepare for this transition and help ensure uninterrupted service access.

General Information

Why is LexisNexis Risk Solutions updating the domain?

We are consolidating our service access points under the **lexisnexisrisk.com** domain to simplify our network architecture. This strategic update enhances the security, reliability and performance of our services. It aligns with our strict global security standards to support your ongoing compliance and risk management efforts.

Who needs to prepare for this transition?

This change impacts organizations that utilize our API endpoints, web portals or integrated financial services solutions. Customers who currently restrict network traffic using allow lists or rely on hardcoded integration endpoints must take action to maintain seamless connectivity.

Required Actions and Integrations

What specific technical actions must organizations take?

Your IT or network security team must proactively update network configurations. Specifically, teams must ensure that ***.lexisnexisrisk.com** is added to organizational allow lists, firewalls and proxy configurations. Completing this step before the transition date will help prevent service interruption.

How does this domain transition impact current API configurations?

If your current integrations rely on hardcoded IP addresses or legacy domain names, you must prepare

to update these endpoint references. Your development team needs to review API configurations and transition them to the new lexisnexisrisk.com endpoints to help ensure scalable integration and continuous real-time verification.

How does this domain transition impact customers who use Single Sign-On (SSO)?

Customers who access LexisNexis® Risk Solutions platforms using Single Sign-On (SSO) will continue to authenticate using their existing identity provider. This transition does not change your authentication method or require adoption of a new SSO solution.

However, because SSO configurations may reference specific application URLs as part of the authentication flow, some organizations may need to review their identity provider configuration when transitioning from lexisnexus.com to lexisnexisrisk.com.

SSO customers should also ensure that *.lexisnexisrisk.com is included in their organization's allow lists, firewalls, and proxy configurations, as outlined above. During the transition period, both domains are active, allowing time to validate access before the legacy URLs are decommissioned.

What steps should individual users take?

Individual users who access our services through web portals need to update their saved browser bookmarks to reflect the new URLs once the transition takes effect.

Timeline and Support Details

When will the infrastructure update take place?

The retiring URLs will begin to be decommissioned in the fourth quarter of 2026. We strongly recommend that your organization makes the necessary network configuration changes before **October 15, 2026**, to ensure continuous access to your data insights and payment verification workflows.

Is Testing Needed?

The lexisnexus.com URLs already redirect to the new lexisnexisrisk.com URLs, so your production traffic is already successfully transacting in the new domain making transaction testing unnecessary. However, it is still important that you update your systems to connect with the new URL since the lexisnexus.com URLs will be decommissioned.

Who should we contact for technical support or specific URL inquiries?

We understand that modifying enterprise network configurations requires careful planning and precise technical details. We are dedicated to ensuring a smooth transition for your organization. If you have

questions regarding this change, please contact the Support team listed for your application or platform below.

Application Details and Support

Please refer to the information below for specific details regarding the platforms your organization utilizes.

LexisNexis® Batch Products

URL that will be retired	Replace with URL
batchwebgateway.lexisnexis.com	batchwebgateway.lexisnexisrisk.com

For assistance with any of the above application or platform URLs, contact Support at 888.270.2836 option 3 or batchtechsupport@lexisnexisrisk.com.

LexisNexis® Bridger Insight® ****UPDATED April 30, 2026, with additional URLs**

URL that will be retired	Replace with URL
bridger.lexisnexis.com	bridger.lexisnexisrisk.com
